

rubitec ag

VARUMILL Product comminution for the chemical and pharmaceutical industries. No off-the-peg item but custom-tailored to your individual need

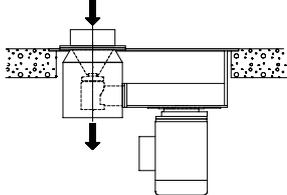

VARUMILL combines ideally the proven conical and cylindrical arrangements of crushing screens and rotor with the technical advantages of the rubitec system.

- CIP-compatible even with inbuilt screen
- design conforming to GMP
- energy supply from technical room according to GMP
- enclosed and cooled drive for clean room operation
- free choice of inlet and outlet branches
- no screws in production cavity
- use in  -zone

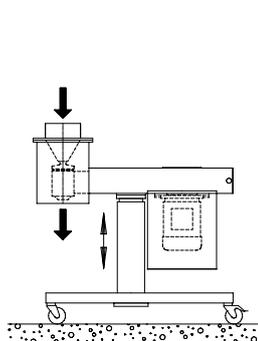

Customer-specific integration in a production line

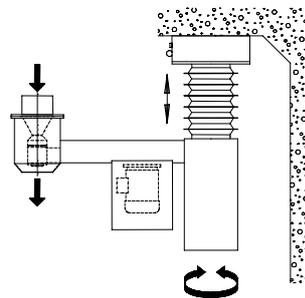

VMG100
VMG125

- Installation in ceiling penetration

- Mobile with height adjustment

- Swivelling between different lines
- Stackable between product containers
- Combinable with
 - Rubitec lift/tilters
 - Rubitec explosion isolation

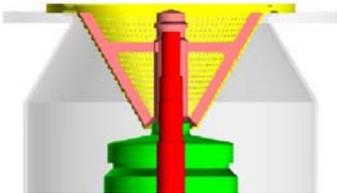

VMG200

3 system's – 1 unit!

Conical screen and rotor

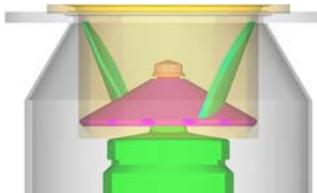

- Milling gap adjustment by vertical adjustment of the rotor

- Screens and rotors for different products: dry or moist
- Screens changed without tools
- Gas-flushed shaft seal

Cylindrical screen and rotor

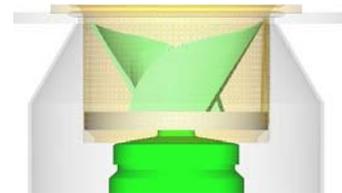

- Fix milling gap
- Higher capacity
- Better discharge
- Shorter dwell
- Less temperature rise

- Optionally with CIP nozzle
- Low overall height of crush housing

Cylindrical screen and rotor

- Milling gap adjustable
- Including all advantages of the standard cylindrical construction

- Application of conic and cylindric screen with corresponding rotor's
- **NEW!** Adjustable milling gap also with cylindrical screens!

- **Additional pre breaker to sieve mill type VaruMill 300**
- **Pneumatic actuated chisel prevents stocking of product**
- **Pneumatic actuated chisel give big space for big lumps**
- **Unit can get fitted onto the standard sieve mill. Mill can be used with or without pre-breaker.**
- **Simple assembling and dismantling for cleaning, without using tools**
