

TRI-CLAMP EASY CLEAN 125TC[®]

DN50/PN10

For cleaning internals between batches

This sampling valve has one Tri-Clamp (TC) 2.5" near the handwheel (*FIG. 1*).

Called "EasyClean", the piston can be removed from the valve housing with the minimum of effort allowing full cleaning as shown on the picture (*FIG. 2*).

Please note, the dryer or the vessel has to be empty for this procedure. For CIP options (Cleaning In Place), please refer to page 20.
